

SECURITY OFFICERS CAN'T BE EVERYWHERE. BUT INTELLISEE CAN.

VIDEO FATIGUE
SETS IN AFTER
20 MINUTES
OF SCREEN
MONITORING

Security in healthcare is a complex challenge. Stress levels are high, lives are on the line and large facilities have patients, visitors, and staff coming and going at all hours. Surveillance has expanded beyond garages, entrances, and ED's but when left unmonitored, cameras are only used for after-the fact forensics and documentation. When monitored, overtaxed security staff are charged with addressing threats while also finding them - all while avoiding video fatigue as they search for threat needles in a haystack of screens. **With threats increasing and resources decreasing, how do you keep people safe?**

GET SMARTER WITH INTELLISEE®

Artificial Intelligence (AI) advances can help breakthrough these challenges. IntelliSee is an AI-threat detection and risk mitigation platform that adds a complementary layer of security to your existing surveillance without adding personnel or expensive upgrades. IntelliSee uses advanced AI to autonomously monitor, detect, and alert you to threats, so your people can act and respond faster.

MONITOR

Simultaneously monitor existing surveillance cameras 24/7/365 to proactively detect multiple risks in real time.

DETECT

Autonomously detect drawn weapons, trespassers, no-shows, slip and fall risks, and more.

ALERT

Instantly alert your people and systems and provide situational awareness. Continue monitoring until the situation is resolved.

ACT

Free your resources to act quickly-when seconds can be the difference between an incident and a tragedy.

ONE PLATFORM, MULTIPLE RISKS

IntelliSee detects multiple risks for one simple fee.

WEAPON DETECTION:

- Detect drawn weapons before a shooter enters or before shots are fired
- Advanced AI trained on hand and long guns and other carried devices to ensure accuracy
- Instant alerts with context dramatically speed up response

PERSON DETECTION:

- Detect trespassing during designated times and locations
- Alert staff if guards or others are missing for a period of time
- Detect activity in confined and remote workspaces

SLIP & FALL DETECTION:

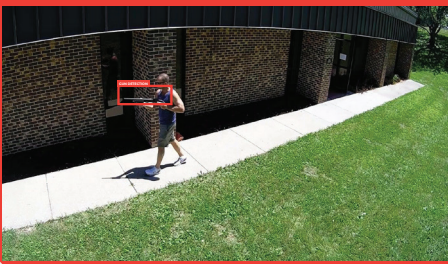

- Identify slip hazards before someone falls
- Detect and respond to falls as they happen
- Bookmark footage for future reference
- Escalate response if someone stays on the ground

SMARTER SURVEILLANCE

- Enhance existing security installs without adding personnel or expensive upgrades.
- Proactively address threats such as drawn weapons, slip and fall hazards, trespassing, no-shows, and more with 24/7 autonomous monitoring.
- Instant and escalating alerts speed up response and minimize severity
- Simple, intuitive, secure set up with customizable parameters.
- Platform solution that constantly learns and improves with each upgrade.
- Integrates with other systems such as dispatch, VMS, access control, etc.

ALERT - WEAPON DETECTED

PROTECT WHAT MATTERS MOST

In a world of increasing risks, smarter solutions are needed. Proactively protect staff, patients and property with IntelliSee. **Smarter surveillance for a safer world.®**
