IntelliSee®

SCHOOL STAFF CAN'T BE EVERYWHERE. BUT INTELLISEE CAN.

1 IN 4
### MASS SHOOTINGS
OCCUR IN AN
EDUCATIONAL ENVIRONMENT

Balancing a safe learning environment without distracting or scaring students is challenging. Most schools don't have dedicated security and those that do wish they could have more. It seems that threats are increasing but resources are shrinking everywhere.

Surveillance is a worthwhile investment and school use is increasing. While cameras can act as a deterrent, unfortunately, most aren't monitored—meaning they can only be used for after-the-fact forensics and documentation. **What if you could turn existing cameras into proactive security tools instead?**

GET SMARTER SECURITY WITH INTELLISEE®

IntelliSee is an AI threat detection and risk mitigation platform that adds a complementary layer of security to your existing surveillance without adding personnel or expensive upgrades. It's always on, before, during and after school hours, scanning for threats and alerting to potential hazards.

Through advanced AI, IntelliSee supplements your existing security strategy by providing a constant layer of unobtrusive protection. IntelliSee's real-time alerts also give your people the time to react and respond faster.

MONITOR	DETECT	ALERT	ACT
Simultaneously monitor existing surveillance cameras 24/7/365 to proactively detect multiple risks in real time.	Autonomously detect drawn weapons, trespassers, no-shows, slip and fall risks, and more.	Instantly alert your people and systems and provide situational awareness. Continue monitoring until the situation is resolved.	Free your resources to act quickly—when seconds can be the difference between an incident and a tragedy.

ONE PLATFORM, MULTIPLE RISKS

IntelliSee detects multiple risks for one simple fee.

WEAPON DETECTION:

- Detect drawn weapons before a shooter enters or before shots are fired
- Advanced AI trained on hand and long guns and other carried devices to ensure accuracy
- Instant alerts with context dramatically speed up response
- Integrates with access controls and other systems

PERSON DETECTION:

- Detect trespassing during designated times and locations
- Alert staff if guards or others are missing for a period of time
- Detect activity in confined and remote workspaces

SLIP & FALL DETECTION:

- Identify slip hazards before someone falls
- Detect and respond to falls as they happen
- Bookmark footage for future reference
- Escalate response if someone stays on the ground

ALERT-WEAPON DETECTED

SMARTER SURVEILLANCE

- Enhance existing security installs without adding personnel or expensive upgrades
- Proactively address threats such as drawn weapons, trespassing, slip and fall hazards, and more with 24/7 autonomous monitoring
- Instant and escalating alerts speed up response
- Simple, intuitive, secure set up with customizable parameters
- Platform solution that constantly learns and improves with each upgrade

PROTECT WHAT MATTERS MOST

In a world of increasing risks, smarter solutions are needed. Proactively protect students, staff, and property with IntelliSee. **Smarter surveillance for a safer world.**®
