

Simplicity Engineered

HC3[®] The simple, scalable, highly available appliance solution for modern virtualization.

Edge Computing and Hyperconverged Infrastructure

Scale Computing brings together virtualization, servers, storage, and backup/disaster recovery into a single solution. Highly automated with machine intelligence, HC3 infrastructure is built to eliminate downtime and be easy to manage for any computing environment.

Simplicity

Ease of use and simplified management are what HC3 does best. HC3 eliminates mundane management tasks, saving the valuable time of IT administrators to allow them to focus on innovation and improving business processes. The simplicity of HC3 directly impacts IT with higher productivity and lower costs.

Scalability

One of the most challenging tasks for IT can be adding capacity to existing infrastructure. With HC3, the simplicity of design and ease of use allow for seamless scaling. New appliances can be added into a running cluster seamlessly, within minutes, and without disruption to any running workloads.

Availability

Intelligent automation, redundancy, high availability, and resiliency are built into HC3 in every way, including the option of disaster recovery as a service. With HC3, planned and unplanned downtime can be virtually eliminated, creating more confidence with customers both internal and external.

Virtualization The Old Way

Virtualization The HC3 Way

- Web-Based Management
- Non-Disruptive System Updates
- Self-Healing Architecture
- Rapid Deployment
- Backup and Replication
- Seamless Scale Out

HC3[®] Use Cases

Edge Computing & Distributed Enterprise

HC3 customers who manage remote sites see the value in HC3 for both ease of use and low entry cost. The rapid deployment, self-healing, and remote web-based management capabilities mean that their remote sites can be managed more efficiently and with less cost.

Backup & High Availability

The built-in backup and high availability features in HC3 provide more options to implement local, offsite, and cloud-based DR or to combine with third-party backup solutions. HC3 customers have peace of mind that their VMs and data are protected.

Lowering Infrastructure TCO

HC3 was designed to reduce IT infrastructure costs in almost every way. Many of the hidden IT infrastructure costs such as unplanned downtime, management, maintenance, training, and consulting are virtually eliminated with HC3. Other solutions that integrate multiple vendor solutions only add complexity which increases costs. We believe HC3 is a better way, and our customers agree.

Virtual Desktops (VDI)

The low cost, ease-of-use, and scalability of HC3 make it perfect for VDI infrastructure. Scale Computing has validated our solution with VDI vendors to allow our customers to implement VDI from the SMB to the enterprise.
